

Programming Over Project 25

POP 25, ASTRO 25 and ASTRO Conventional

This feature enables configuration data to be upgraded to your radio over-the-air. This feature retains full use of the radio during the configuration data transfer without interrupting communication. The upgrade pauses to give priorities to voice call, and continues after the voice call ended. Once a configuration upgrade is downloaded to your radio, you can install new changes immediately or delay changes to be installed on the radio when it is being powered up. Your radio can also be configured to allow you to accept or reject an upgrade.

Note: This feature must be preprogrammed by a qualified radio technician. Check with your system administrator for more information.

Responding to the notification of Upgrade Procedure:

- The display shows **'Upgrade?'**
-

- Press the **Menu Select** button below **'Acpt'** to accept the request to upgrade immediately. The display shows **'Upg Rx In Prog'** to indicate the upgrade received is in progress.
OR
Press the **'Menu Select'** button below **'Dlay'** to delay the request to upgrade. The radio prompts to upgrade in the next power up of your radio.
OR
Press the **'Menu Select'** button below **'Rej'** to reject the request to upgrade. The display shows **'Upg Aborted'**. The radio continues to function with the current configuration until it gets reprogrammed.
-

- If the upgrade is successful, the display shows **'Program done'**. The radio now has the new configuration.
OR
If the upgrade failed, the display shows **'Program failed'**. The radio remains in current configuration.

If your radio has problem of upgrade over-the-air, contact the City of Austin Wireless Office at 512-9270-3200 for details.
